

CHIFA Members Directory, February 2018

CHIFA addresses the information and learning needs of those responsible for the care of children in developing countries, including mothers, fathers and family caregivers as well as health workers. Its remit includes children's rights to health and healthcare, and the social determinants of health.

Every member of the CHIFA forum has a 'personal profile', which is added to the end of each message they send to the group. In addition, **some members** have given specific permission for their profile to be included in this CHIFA Members Directory. If your profile is not listed and you would like to include it, please contact the HIFA Coordinator, Neil Pakenham-Walsh, at neil@hifa.org

The CHIFA Members Directory is intended to facilitate direct one-to-one contacts between members. The Directory is publicly available on the Publications/Reports page of the HIFA website: www.hifa.org/about-hifa/publications

Disclaimer: Please note that the moderators of CHIFA are unable to verify the accuracy of information provided by members. It is also possible that some profiles are out of date or are ex-members.

To add, remove, or change your profile, please send an email to: admin@hifa.org

CHIFA is jointly administered by the International Child Health Group, the International Society for Social Paediatrics and Child Health, and the Global Healthcare Information Network. www.hifa.org/forums/chifa-child-health-and-rights

iaitken AT msh.org

Grace Ajuwon is the Reference and Information Services Librarian at the University of Ibadan, College of Medicine, E Latunde Odeku Medical Library, Nigeria.
agajuwon AT yahoo.com

Jane Amongi Akora is current President of the Association for Health Information and Libraries in Africa (AHILA) and is Librarian at WHO Country Office in Uganda. She is a HIFA Country Representative for Uganda, a member of the HIFA Working group on Library and Information Services. www.hifa.org/support/members/janeamongiakoraj AT who.int

Lilian Chinwendu Akuma is a Physiotherapist with the Child and Adolescent Center of the Federal Neuro-psychiatric Hospital in Yaba, Lagos, Nigeria. For 7 years she has been working with children with orthopedic and neurological conditions with experience in community physiotherapy. Her interest is to create awareness among parents and health professionals in her country about childhood neurological conditions and management as early intervention is key in management of these conditions. In my few years of practice I have seen parents bringing their kids who are 6 years old who have developmental delays to the hospital for the first time because they did not know what was wrong with the child and felt the child was just being lazy and the health professionals especially in the rural area are not well trained or equipped to handle the situation or do the proper referral. I am also interested in learning from others who have achieved this in other countries how they were able to do it. I intend to start a research soon in the south eastern part of Nigeria on what are the challenges in the early diagnosis and management of neurological and developmental conditions in children. lilychinweakuma AT gmail.com

Jackeline Alger works in the Parasitology Service, Department of Clinical Laboratories at the Hospital Escuela Universitario, and at the Faculty of Medical Sciences, Universidad Nacional Autonoma de Honduras, Tegucigalpa, Honduras. She is a country representative for HIFA and CHIFA for Honduras.
www.hifa.org/support/members/jackeline jackelinealger AT gmail.com

Jamie Erskine has been a Medical Officer at WEC International, Sibanor Health Centre for over 15 years and has started programmes for hospital based malnutrition in 1990-91 and for hospital and home based HIV care since 2008, both following evidence bases from WHO and leading medical journals . He has had extensive recourse to the WHO website and publications and helped review the WHO pocket book of emergency paediatrics in its earlier draft. His work has included the training of Gambian nurses and midwives in appropriate but up-to-date obstetrics, paediatrics and medical care. Although returning to UK in July 2011, Jamie remains passionate about relevant training for both local and expatriate medical workers working in low resource settings. jamieerskine AT doctors.org.uk

Clare Gilbert co-Directs the International Centre for Eye Health with Professor Allen Foster. The Centre is a WHO Collaborating Centre for the Prevention of Blindness, and is based at the London School of Hygiene and Tropical Medicine, UK. The aim is to prevent blindness, particularly in low and middle income countries. The Centre does this in two broad ways: firstly by undertaking research, to provide the evidence needed by planners and managers so they can plan programmes for the prevention

of blindness that are tailored to the needs of communities, and secondly, through education, including a one year MSc in Community Eye Health in London, and support for two, 3 month courses in Community Eye Health in Southern Africa. The Centre also manages up to 30 one week courses on VISION2020 in all regions of the world, and produces the Community Eye Health Journal which goes free of charge, four times a year to over 20,000 eyecare professionals in more than 150 countries (www.cehjournal.org). The Centre produces other educational materials, as required, and also "links" eye departments in the UK with training institutions in Africa, for capacity building and skills transfer. Clare has been a Medical Advisor to Sightsavers International since 1995. Clare.Gilbert AT Ishtm.ac.uk

Melissa Gladstone is a Senior Lecturer in Paediatric Neurodisability and International Child Health at the University of Liverpool in the UK. Agneta Golan is the Head of the Neonatal unit in Soroka University Medical Center Beer Sheva, Israel. In the context of international health she has two areas of activities: 1. Since 2007 she is involved in a project aiming to improve neonatal care and to reduce neonatal mortality in Kumasi Ghana. This project is supported by the Government of Israel and is in collaboration with MCI. Two neonatal units based on Kangaroo Mothercare were built and equipped by Israel's Agency for International Development Cooperation (MASHAV) in two community based hospitals in Kumasi. Together with 3 other colleagues from her unit she is involved in training basic neonatal care of nurses and doctors using low cost and simple methods. In this project a professional team from Kumasi is also involved and the program evolves as a collaboration. Part of the training is in Kumasi and part in our neonatal unit in Beer Sheva Isarel. 2. Her second activity is teaching in the Medical School of International Health in Beer Sheva. Her main areas of teaching and research includes training medical students in pediatric health issues from a global perspective. She is also the academic coordinator of a Cross Cultural workshop dealing with cultural sensitivity and cultural competency of medical students. agneta.golan AT gmail.com

Roxanne Goldade has been practicing Community Paediatrics in Calgary since 1995. She has a very busy practice with a focus on Developmental, Behavioural, Psychiatric and Social Paediatrics. She is also the Physician Lead for P-KIC (Paediatrics for Kids in Care) and the new Social Pediatrics Unit. She is an active member of the Canadian Paediatric Society. Her passion is Advocacy and Communication. Roxanne will state that so much can be solved if people would/could just dialogue. We ARE the leaders and need to help our society (and children) move forward to achieve its (their) full potential. rgoldade AT telus.net

Kate Goldberg is a Consultant Paediatrician at Blackpool Victoria Hospital, UK, with an interest in Accident & Emergency, high dependency and critical care, and also education, particularly multi-disciplinary teaching and training. I am an APLS

(Advanced Paediatric Life Support), Neonatal Life Support / Generic Instructors Course instructor and am interested in the difficulties encountered by clinicians in developing countries. I am really keen to learn from the problem solving approach taken in many developing countries. Ultimately I am looking forward to contact with colleagues working in different countries for shared learning experience!

Jeffrey K Griffiths is a Public Health Academic Physician who trained in internal medicine, pediatrics, and infectious diseases. His areas of expertise include the epidemiology of waterborne diseases, particularly cryptosporidiosis; of micronutrient interventions; and of diarrheal disease and pneumonia in children. He has worked with colleagues in East Africa to develop a network of educational institutions, which share co-developed curricula relating to public health and environmental health. In Ecuador he has worked with colleagues on interventions for pneumonia and diarrheal disease prevention. At Tufts University he is a member of the faculty of Medicine, and the schools of Nutrition, Veterinary Medicine, and Engineering. He serves as the Chair of the Drinking Water Panel of the Science Advisory Board of the US Environmental Protection Agency. jeffrey.griffiths AT tufts.edu

Mary Grimanis is Health Care Coordinator at The Akaa Project., Inc, a U.S. based non-profit, and she is based in Ghana. Professional interests: I'm a pediatric nurse practitioner interested in assisting families in the Akaa region of the Yilo Krobo District of the Eastern Region of Ghana to improve their health, navigate resources in their district and improve access to high quality health care. To date, families rarely pursue health care since they rely on traditional medicine and spiritual care from the prophet in the community. My hope is to work alongside other NGO's, the Ministry of Health, United Nations, WHO, other invested partnerships while encouraging participation, education and self reliance among families in the region. The involvement of the prophet and traditional healers are essential to moving this initiative forward. So far, health care endeavors have centered around the Asiafro Amanafro Community School, built to educate children in a location where they had never attended. However, education of adolescents and adults in the area is another high priority and initiative in process at this time. The Akaa Project is eager to unite with the academic, health care, and business sectors globally to make a difference in the lives of families in this resource limited setting. mgrimanis AT theakaaproject.org

Vineet Gupta is a Physician Researcher engaged in clinical research at the All India Institute of Medical Sciences, New Delhi, India. He envisions collaborative research projects between the developed and the developing world and egalitarian approach towards dissemination of scientific knowledge by enhancing indigenous research and journals. He has been part of the efforts in establishing a concern for Emergency Medicine as a distinct specialty in India. vineet_gsvm AT yahoo.com

Martin Gwewasang works with the Adele Reproductive Health Foundation (formerly, Adele Reproductive Health Centre), Cameroon. Growing up in the indigenous community of Bafut, Dr Gwewasang he saw firsthand the damage that inequity and a lack of access to health care and education can inflict upon women and children. He believes that these tenets are basic human rights that should be available to all women and girls. He is a pioneer in his native Bafut community with a demonstrable interest in the field of Sexual Reproductive Health and Rights (SRHR) issues for women and girls in the context of human rights, social justice, and other development paradigms, where as a member of the Women's Global Network for Reproductive Rights (WGNRR), he has shown a strong commitment to expanding and promoting the rights of women. His work combines a passion for human rights with a devotion to improve reproductive healthcare and living conditions of marginalized communities, increase access to and choice of Family Planning for low income families, and bring affordable reproductive health and Family Planning information and methods to women and men that go a long way to improve the Demographic Aspects of Public Health in Cameroon. For the last 15 years, Dr Gwewasang (through his Foundation) has been instrumental in empowering women at the individual and community level, and ensuring that while access to safe abortion remains a stigmatized and neglected issue it will be a central focus of his work and his members for 2011-2015. Dr Gwewasang, through his Foundation, has introduced reproductive health issues into local schools, colleges, universities and health facilities (public & private) for maternal and child health and for HIV/AIDS prevention, prepared adults and young people to be community-based health workers and classroom peer educators. Building the capacity of healthcare providers to influence reproductive health policy is a significant part of his work. His work on abortion advocacy has had a particular focus on grassroots community mobilisation and tackling stigma and discrimination by trying to influence civil society leaders and decision makers at this level. The development of policy analysis skills has also been central, and this is where there is a strong link with the Health Rights for Women Assessment Instrument (HeRWAI) and MDG Action Toolkit. adele_healthcentre AT yahoo.fr

Paul Mustardé is a Director of Virtual Development, a Community Interest Company based in the UK. Virtual Development runs the Virtual Doctor Project, an innovative new venture that aims to utilize modern technology that can cope with challenging environments, to make it possible to offer doctor-supported primary healthcare to

remote, under-served areas of Zambia and eventually other parts of Africa. The project will use email communication via satellite, between mobile telemedicine clinics on the ground and doctors based remotely. This system will allow these virtual doctors to offer on-going diagnostic assistance to clinic staff, who will travel between a number of local sites in four-wheel drive vehicles specifically equipped for the purpose, setting up temporary clinics for several days at a time.

Farhan Abdul Rauf is Chief Program Officer, Program Department at the Sanayee Development Organization (SDO) in Afghanistan. Professional interests: Education, peace building, community development and community health, in remote and underserved rural areas of Afghanistan. Rauf is also a HIFA country representative for Afghanistan. www.hifa.org/support/members/farhan-abdul

chiefofficer.sdo AT gmail.com

Owais Raza is a lecturer at Ziauddin University, Pakistan. paperpin27 AT hotmail.com

Sunanda Kolli Reddy is a Developmental Paediatrician from New Delhi, India, with a special interest in Early Child Care and Development of children with neurodevelopmental problems in underserved communities. She is actively involved in health promotion, community-based research, care provider training for promoting abilities of children with special needs, through the various programmes of the Centre for Applied Research and Education on Neurodevelopmental Impairments and Disability-related Health Initiatives (CARENIDHI), which she heads (www.carenidhi.org). Her work in the community settings to widen the disability-in-development model of CBR encompasses the wider determinants of health and human capabilities and issues which impact the lives of the poor. She combines her experience in developmental paediatrics with the core work of CARENIDHI's grassroots convergence programmes in partnership with groups working in the area of Implementation research and policy.

Judie Regis-Findlay trained and qualified as a Paediatric Nurse at St Bartholomew's School of Nursing and Midwifery in 1994. Her first job was at the University College Hospital (London) neonatal unit where she progressed to senior staff nurse. During that time she completed her BSc Hons Degree in neonatal nursing care. She then moved to Great Ormond Street Hospital in October 2003 until December 2006. She is very interested in clinical teaching, particularly working with students and junior staff, in developing their knowledge and skills within the clinical setting. She is also interested in working in developing countries, particularly in a role that involves teaching, development and the passing on of knowledge, skills and experiences to other nurses within neonatal and paediatric care. She is currently completing her MSc in International Child Health at the Centre for International Health and Development, finishing in 2008. She has experience in general surgery, plastic surgery and ENT surgery. She would like to meet and talk with other nurses who would like to use their knowledge, skills and experience to help our colleagues in the developing world. She is currently not working as a nurse as she would like to finish her studies and also would like to have the opportunity to visit some developing countries in an observatory role or even to do some kind of teaching. regis701 AT btinternet.com

Sheila M Reilly is a Community Paediatrician at Alder Hey Children's Hospital, Liverpool, UK. Her interests include International Child Health, neurodisability, and child public health. She has previous international experience in Latin America and the Middle East. sheilareilly AT doctors.org.uk

Anne Rerimoi is a Paediatrician currently based at the Medical Research Centre, MRC, the Gambia. Her interests are: neonatal survival, health education and community participation and demography in health. arerimoi AT gmail.com

Vasumathi Sriganesh has been a medical librarian from 1992 to 1997, she then ran a consulting organization, "QMed Services", for ten years. In December 2007, she set up a Not-for-profit Trust which she has named QMed Knowledge Foundation. Through the Foundation, she is working at making a change in the medical schools in India, by conducting training programs for students, librarians and faculty, in searching medical literature effectively. She has conducted over 50 training programs and delivered an equal number of short lectures on the topic. She hopes that the Foundation's activity will help the current generation of students value the need for an effective search as a component of the practice of Evidence Based Medicine. She has trained at CASP UK, and hopes to set up CASP India sometime with the help of doctors in India. She currently works closely with INFORMER (an association of undergraduate medical students interested in research) and the South Asian Cochrane Network to collaborate for mutual benefit. The Foundation also helps medical libraries harness the power of Internet resources for their user and maintains a Directory of Indian Medical Sites at www.indianmedicalsites.in. Vasumathi is a member of the HIFA 2013-15 Challenge Group, which promotes communication, understanding and advocacy among HIFA participants and beyond, to move progressively towards our shared vision: "Every prescriber and user of medicines will have access to reliable information on medicines to protect their own health and the health of others". Nand Wadhvani is a Founding Trustee of The Mother and Child Health and Education Trust (MCHET) <http://motherchildtrust.org/>. Over the past 2 decades he has launched several programmes to address the challenge of improving access to essential health and nutrition information in low- and middle-income countries. MCHET works primarily in the areas of mother and child nutrition, water, hygiene, sanitation and diarrhoea prevention, treatment, control and management. Nand firmly believes that the most effective and efficient way to advance health education is by employing a mix of established and newer communication technologies to deliver contextually-appropriate messages directly to the people who need it most. He is presently working on the global implementation of HealthPhone, a family of free illiterate-friendly mobile phone apps. with preloaded, reliable, relevant health and nutrition material in various formats in local languages. Using rich multimedia, HealthPhone puts life-saving and life-changing content directly in the hands of those who can use it in an accessible format and with 24x7 availability,

everywhere. He is a member of the HIFA Steering Group and mHIFA Working Group.

Sarah Wallace is a Programme Manager at Medical Aid Films, UK.

www.medicalaidfilms.org sarah AT medicalaidfilms.org

Rosie Waller is Programmes Manager at No Strings International, UK, (working in various developing countries). Professional interests: No Strings creates innovative puppet films to deliver crucial information to vulnerable young people in various parts of the world that can help save their lives. Children who know how to react in an emergency are far more likely to survive and stay well: puppet films made by some of the leading members of the original Muppet Show and Fraggle Rock team have a way of engaging children very naturally, helping them explore issues that may otherwise create anxiety or be tough to absorb. Programmes include landmine awareness, Afghanistan; natural disasters preparedness and safety, South East Asia; HIV awareness, sub-Saharan Africa; peace building, South East Asia; trauma, child protection and public hygiene, Haiti. Films and accompanying puppet-based discussion methodology have been embraced by many international NGOs, including Trocaire, Plan International, Catholic Relief Service (CRS), Oxfam, World Vision, International Organisation for Migration (IOM), Save the Children and Unicef.

Angeliki Zacharaki has been a Midwife since 2003. She has worked in different areas of maternity care in the UK. She holds an MsC in Midwifery (2006). Her research interests are related to health inequalities and the implementation of guidelines in local/ national/ international level in aspects of midwifery care. The main reason she joined CHIFA is to collaborate with the Greek network in different areas of health research. angeliki82 AT yahoo.com

John Zeal is a Patient Temperature Specialist with Camborne Consultants, UK. His specialist subject is the accurate measurement of body temperature from 'birth to

death'. With Professor David Morley, founder of TALC, he has designed, sourced and introduced the ThermoSpot - a non-invasive hypothermia indicator for neonates, infants and children. This device is a 'first-ever' of its type and is now available as a low-cost intervention for MDG4 where it will save newborn lives. There have been a number of successful studies concluded and published in leading medical journals. temperature.doc AT aol.com
